porakata saka da kaze deka vo folderot kaj sto e instalirana Prima Medica vi nedostasuva folderot skenirani,sto bi znacelo treba samo da odite vo folderot ili da kliknete so desen klik na shortkatot za primamedica koj vi se naodja na desk top,da odite na propertis so lev klik i potoa da izberete finde target i i direktno ce vi se otvori prozorec vo koj samo treba da kreirate nov folder i da mu dadete ime skenirani i problemot ce vi bide resen.
pzzzzz.

Napraviv se kako sto treba po upatstvoto megutoa problemot seuste ne mozam da go resam. Imeno sega namesto The sistem cannot find the path specified stoi sledново objasnuvanje The device is not ready.
Kade gresam?
So pocit!

Napraviv se kako sto treba po upatstvoto megutoa problemot seuste ne mozam da go resam. Imeno sega namesto The sistem cannot find the path specified
toa sto ne se javuva prvata poraka znaci deka problemot so path-ot ste go resile.

The device is not ready.

Ova vtorovo bi doslo deka uredot (skenerot)ne e spremen ili nepravilno e instaliran,proverete dali skenerot funkcioniira na ostanati programi pod windows..

pozzzz....

Fala mnogu za pomosta,sega mozam da gi skeniram dokumentite. Megutoa ima uste eden problem a toa e deka patekata kade se skeniraat dokumentite ne e c>program files>codex>prima medica>skenerani tuku vo d>codis>prima medica>skenerani kade sto morav da kreiram nova pateka so ovie folderi za da mozam da ja izvrsam operacijata skeniranje.

Znaci deka patekata zadadena vo programata e gresna.

So pocit!

zdravo.

milo mi e sto konecno vi e resen problemot so skeniranje dokumenti,a toa so patekata za codis moze i da se smeni no ne bi vi sovetoval da se upustate vo takvi eksperimenti, stom funkcioniira ne go menjajte,bitno e sto dokumentite se skeniraat,samo ne navedovte dali posle skeniranje mozete da gi otvorite so programot..

pozzzz.
